

# BACKOFFICE MANAGER TRAINING GUIDE

SHORT EDITION

# STARTING YOUR DAY

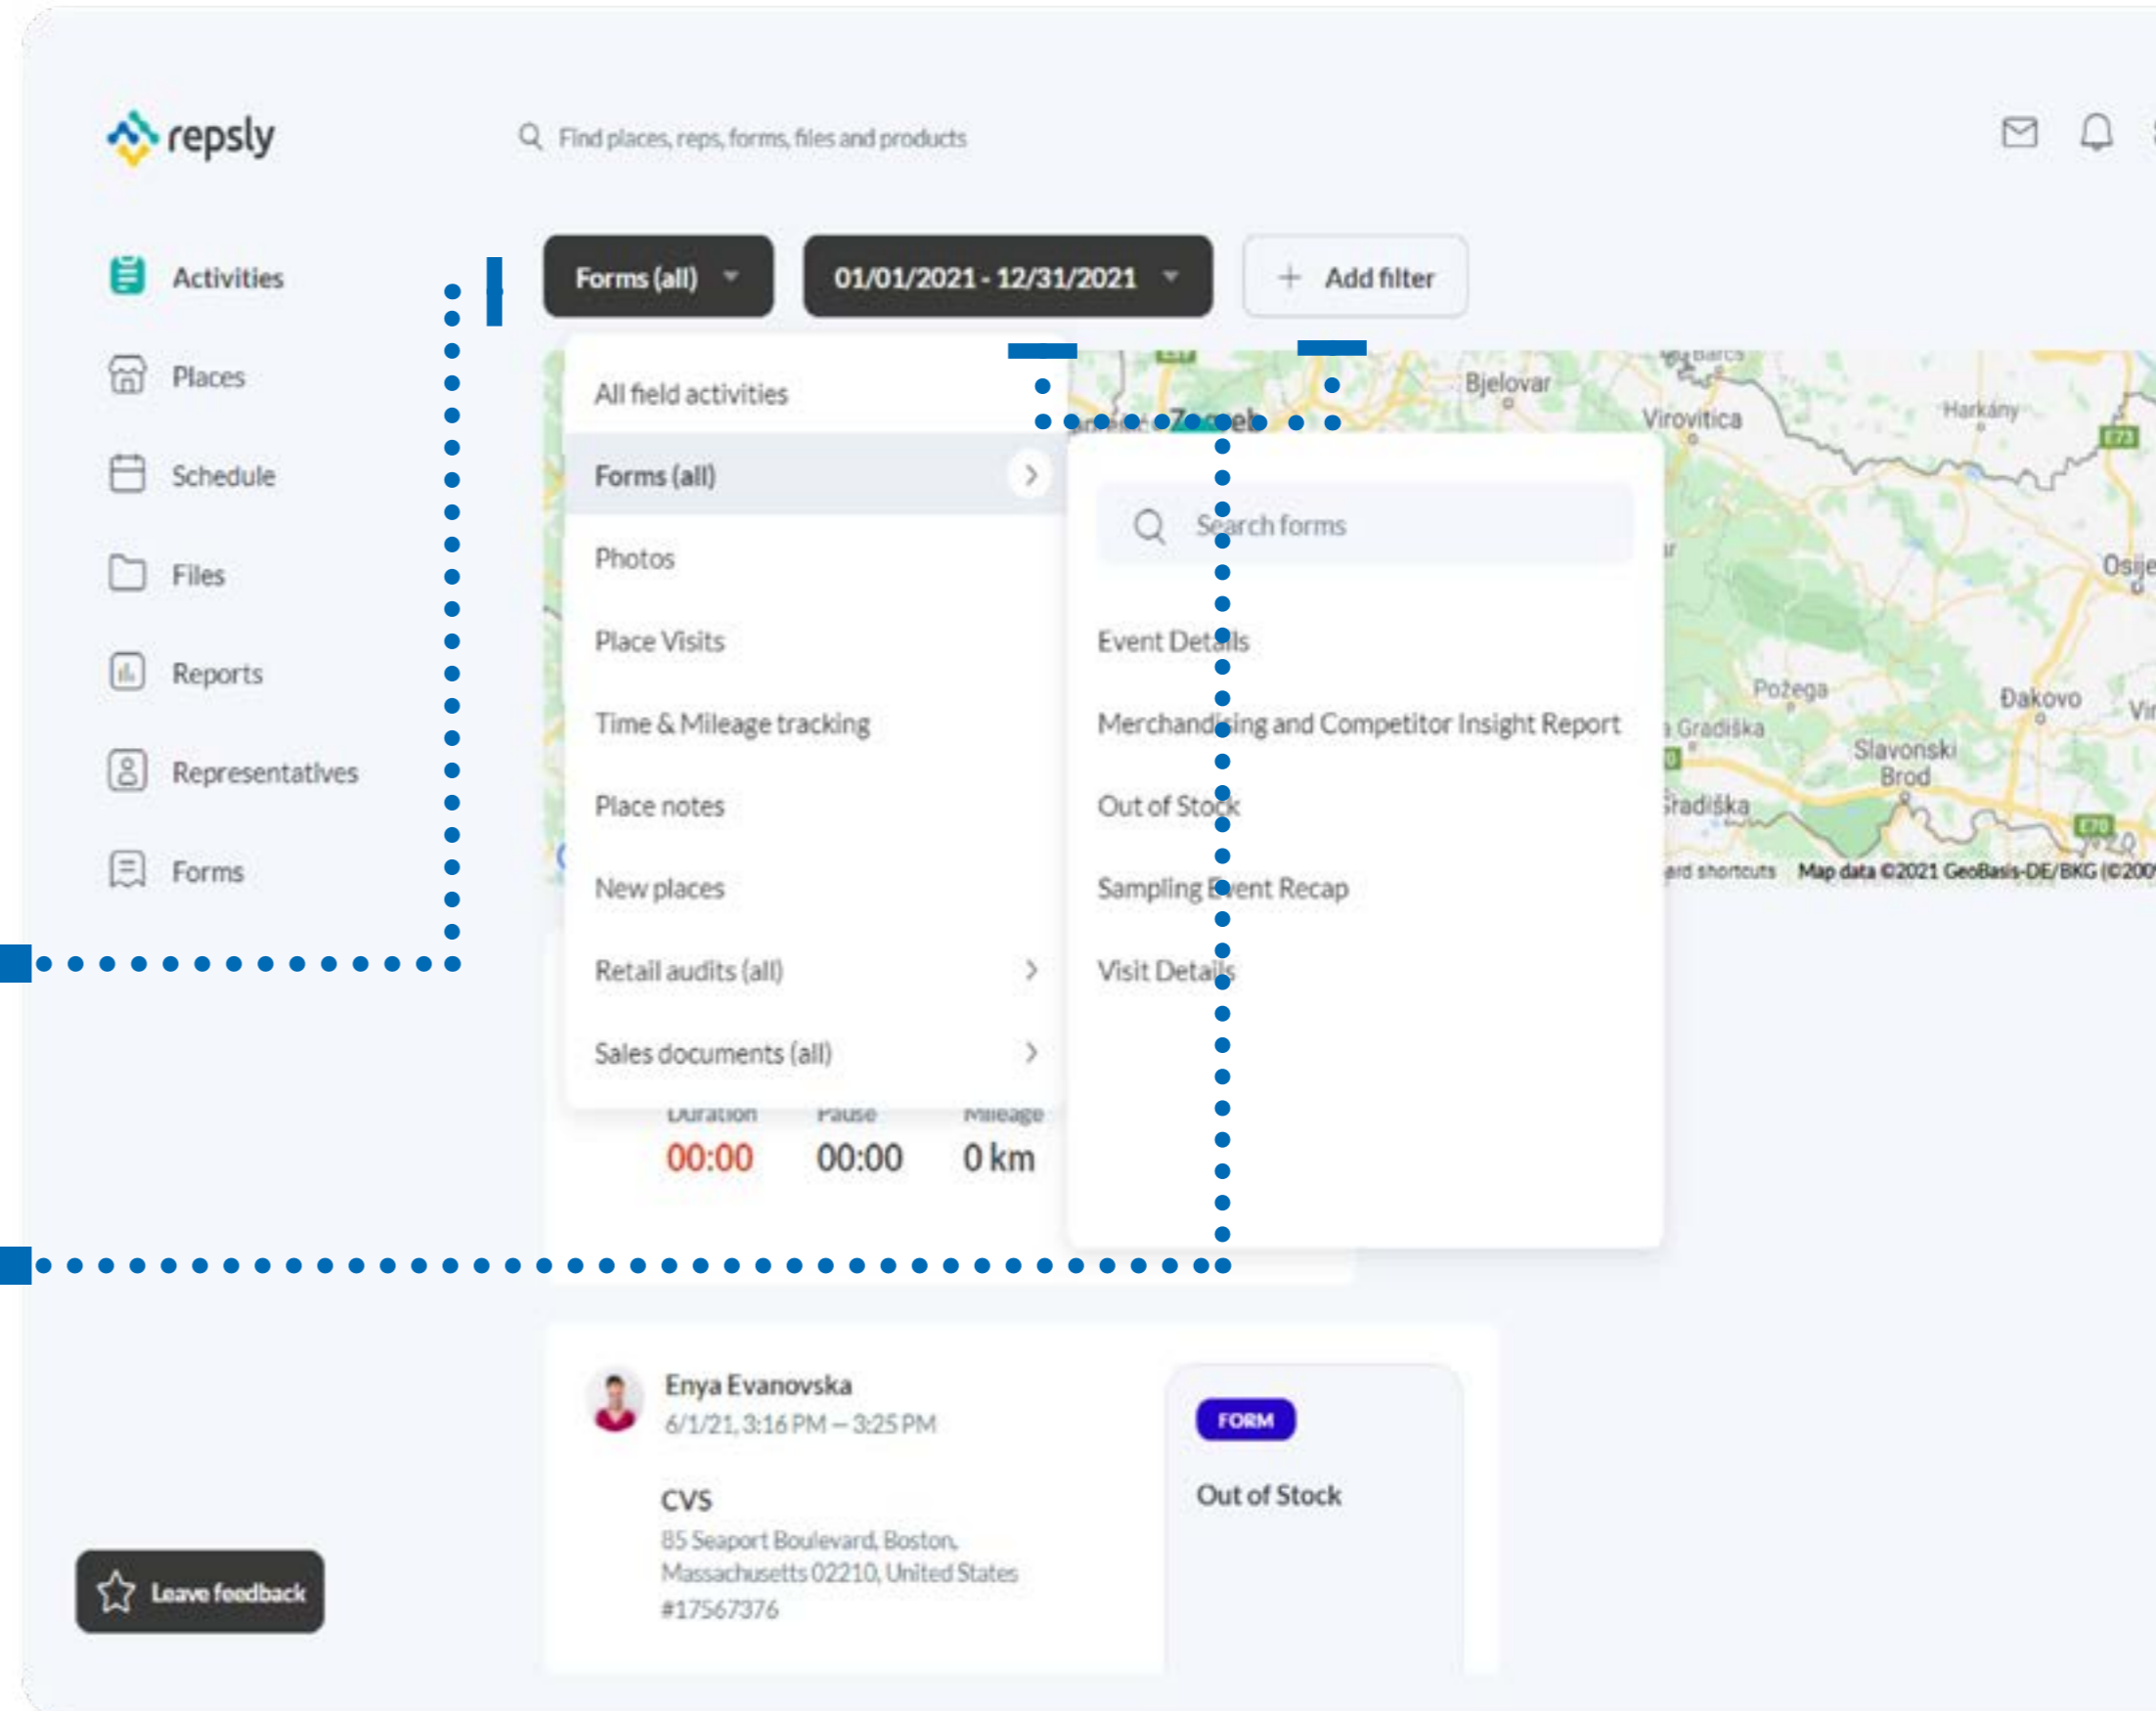

Applying filters will allow management to see and analyze specific activities, people or places in order to manage data more consistently.

You can see chronologically **all activities** (purchase orders, photos, messages, visit notifications, time and mileage, notes, etc.) in real-time. This creates efficiency with regards to team management and collaboration.

Use the **filters** above the map to narrow your search criteria, such as filtering by date range, by a specific rep, tag or territory.

To help you get started with our Activities features, please refer to our knowledge base articles:

# PLANNING YOUR ROUTES

Staying organized and scheduling your account visits can be hard. You can help your Representatives by using Schedule feature, where you can immediately create an event that allows the reps to make the necessary visits.

You can also **set the duration**, **leave a description** and **set tasks** from the representative and **alerts** for yourself.

The screenshot displays the Replsly Backoffice Manager interface. On the left is a sidebar with navigation icons for Activities, Places, Schedule, Files, Reports, Representatives, and Forms. The main area shows the profile of 'Enya Evanovska' with tabs for Info, Report, and Schedule. Below the tabs are filters for 'DONE', 'UPCOMING', 'MISSED', and 'UNPLANNED', along with view options for MONTH, WEEK, DAY, and TODAY. A calendar grid shows scheduled visits as colored blocks. A 'Leave feedback' button is located at the bottom left of the interface.

SUN	MON	TUE	WED	THU	FRI
25	26	27	28	29	
2	3	4	5	6	
9	10	11	12	13	
16	17	18	19	20	
23	24	25	26	27	
	4:50p 7 Eleven 32476 (B) 4:52p CVS 4:54p CVS 5:29p Liquor World	10:10a Whole Foods Aust...			
30	31	1	2	3	
		3:14p CVS			

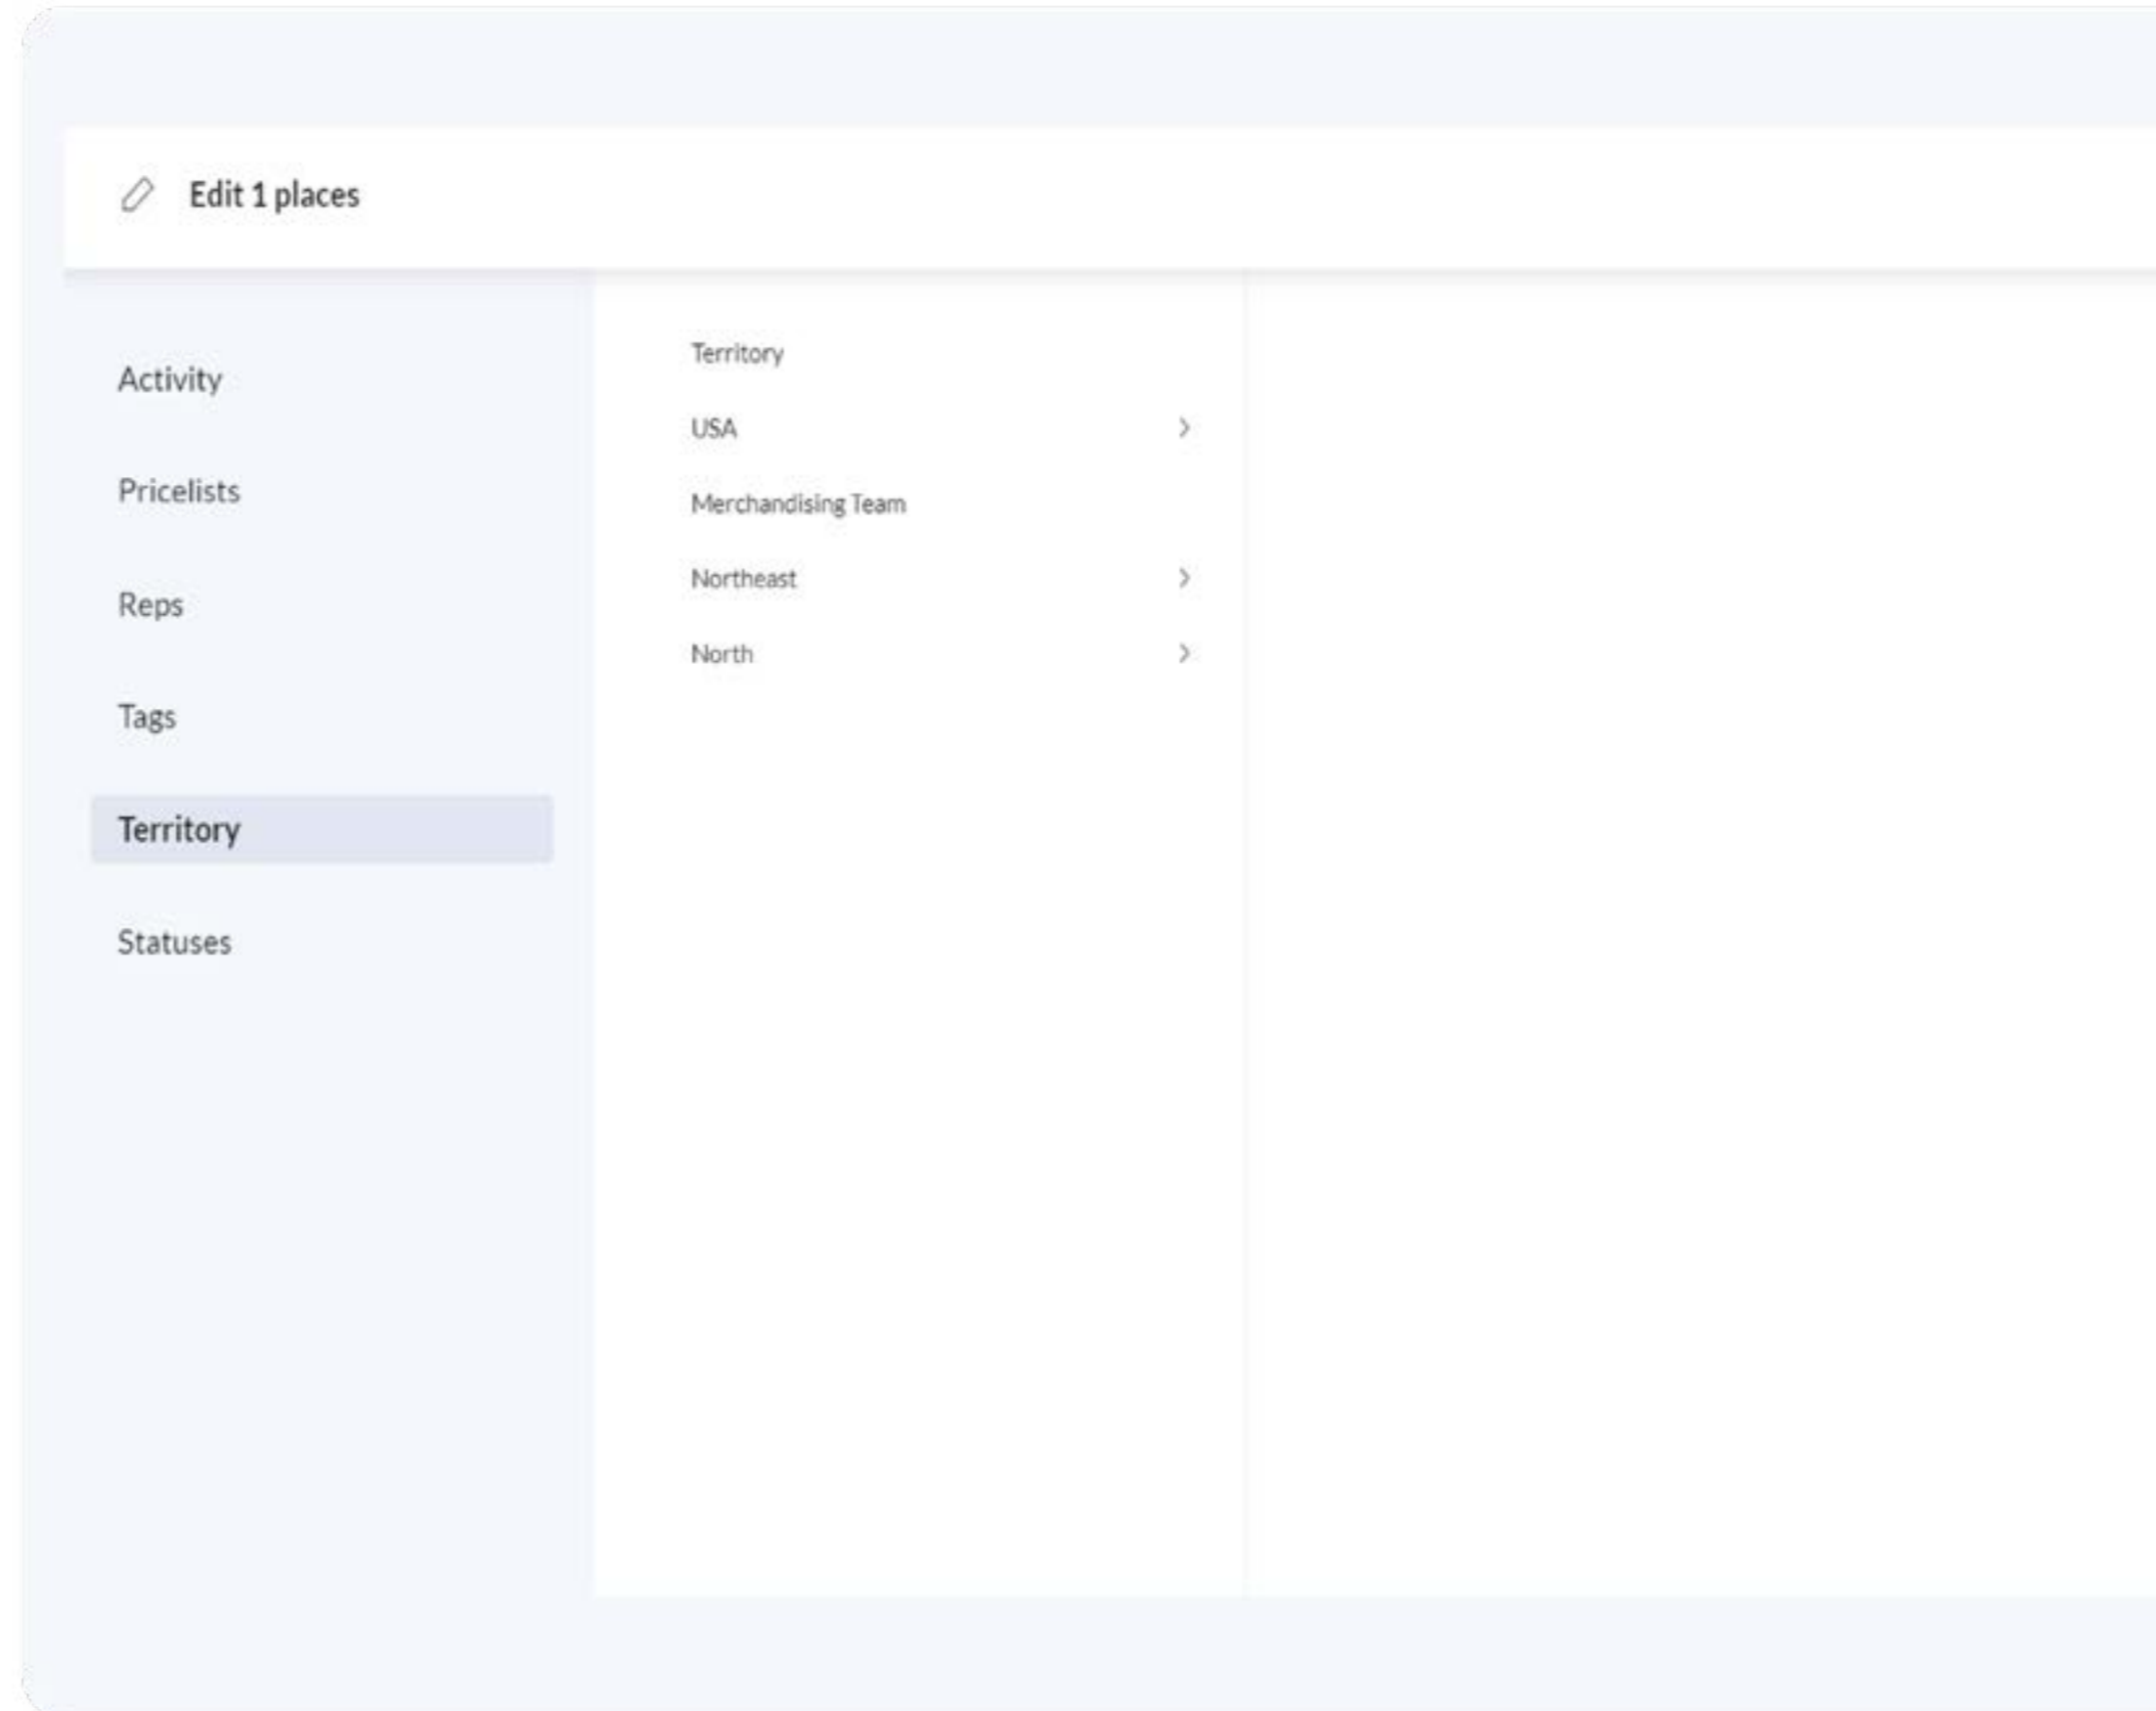

You also have the option to add places and include **additional (custom) attributes** - such as sales pipeline or territory. With Territories, you can easily assign your representatives to specific Territories or multiple levels of the hierarchy - depending on their role.

To help you get started with our optimizing features, please refer to our knowledge base articles:

# VISITING AN ACCOUNT

You can filter your representatives' activities by place visit which will allow you to see all the actions they've made in that place.

The **Forms** feature allows management to create documents that can be filled out by the representatives in the field, allowing for real-time data collection. Add questions to your form and define whether the answer will be mandatory, as well as which type of data the answers will contain.

By creating a **place note**, your reps can improve transparency between departments. This Note can consist of anything that they feel is noteworthy recording during a regular place visit.

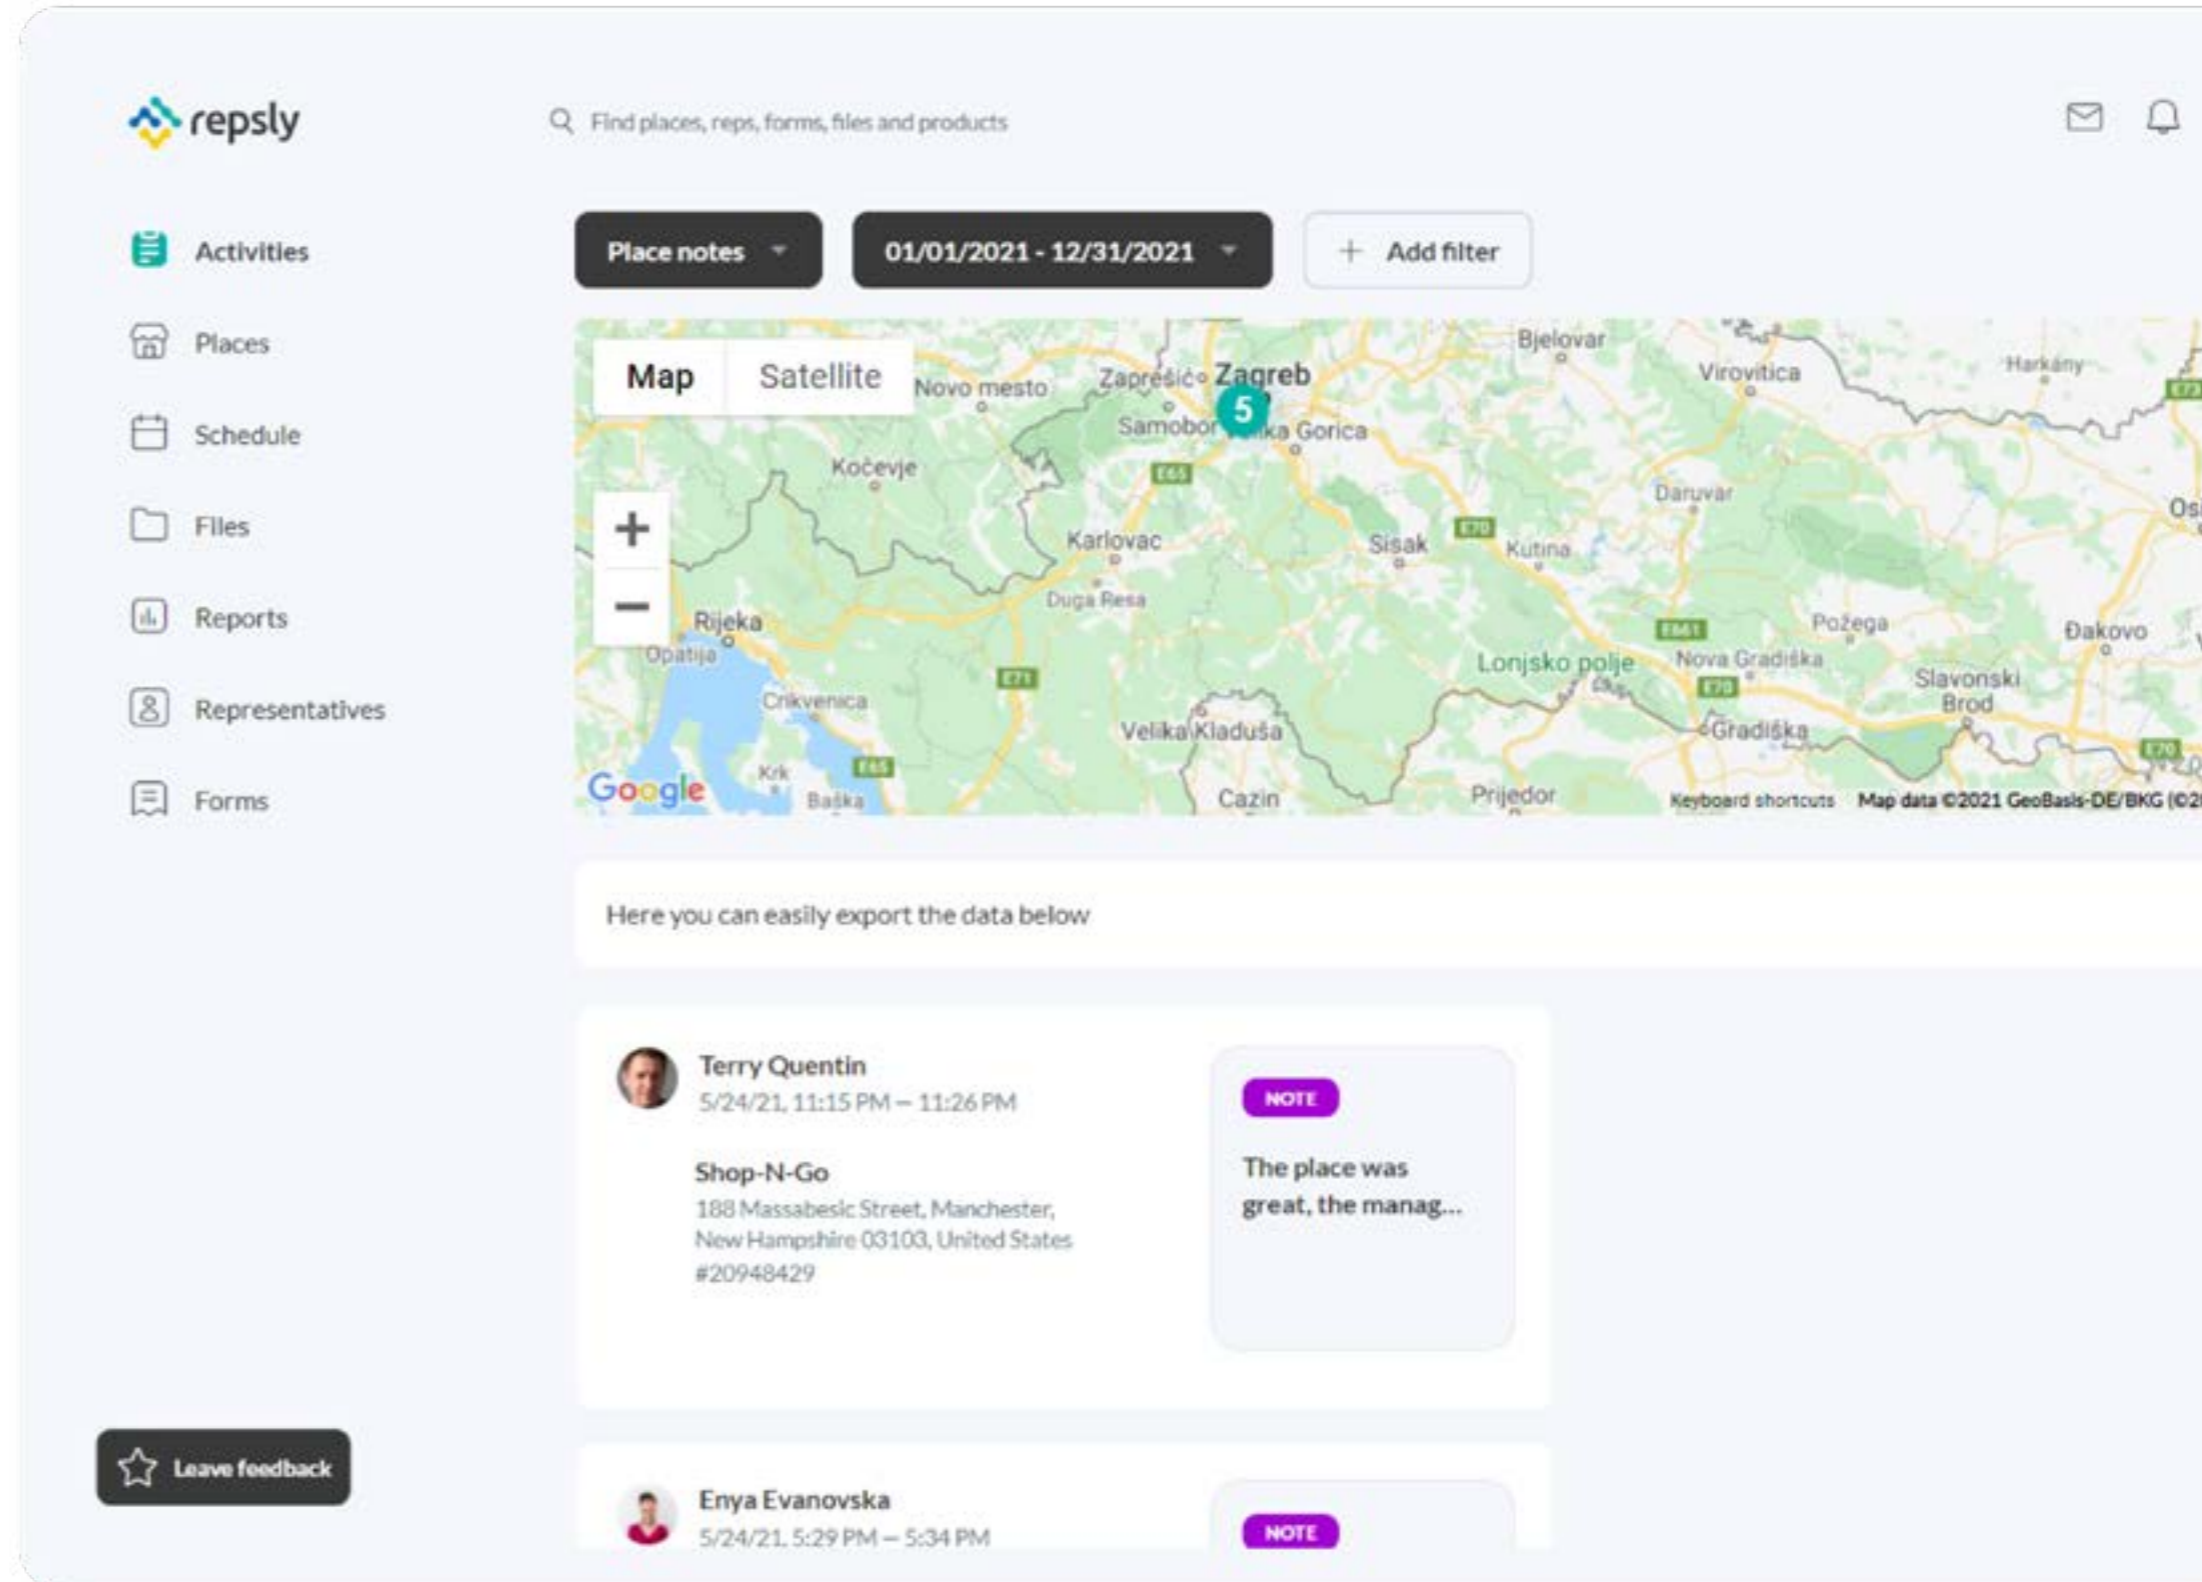

By capturing **photos** on a visit, your reps can create an excellent photo archive of storefronts, shelves or promotional materials. This will allow you to see changes and improvements made on each visit.

To help you get started with our places features, please refer to our knowledge base articles:

# COMMUNICATE WITH YOUR TEAM

Repsly also allows you to improve team communication, collaboration, and coaching.

With our **Messaging** feature, teammates can now message one on one or in groups all from their app. They can share insights or wins (including photos) in context while doing their work. Managers can easily get information out to their entire team or coach individual teammates directly.

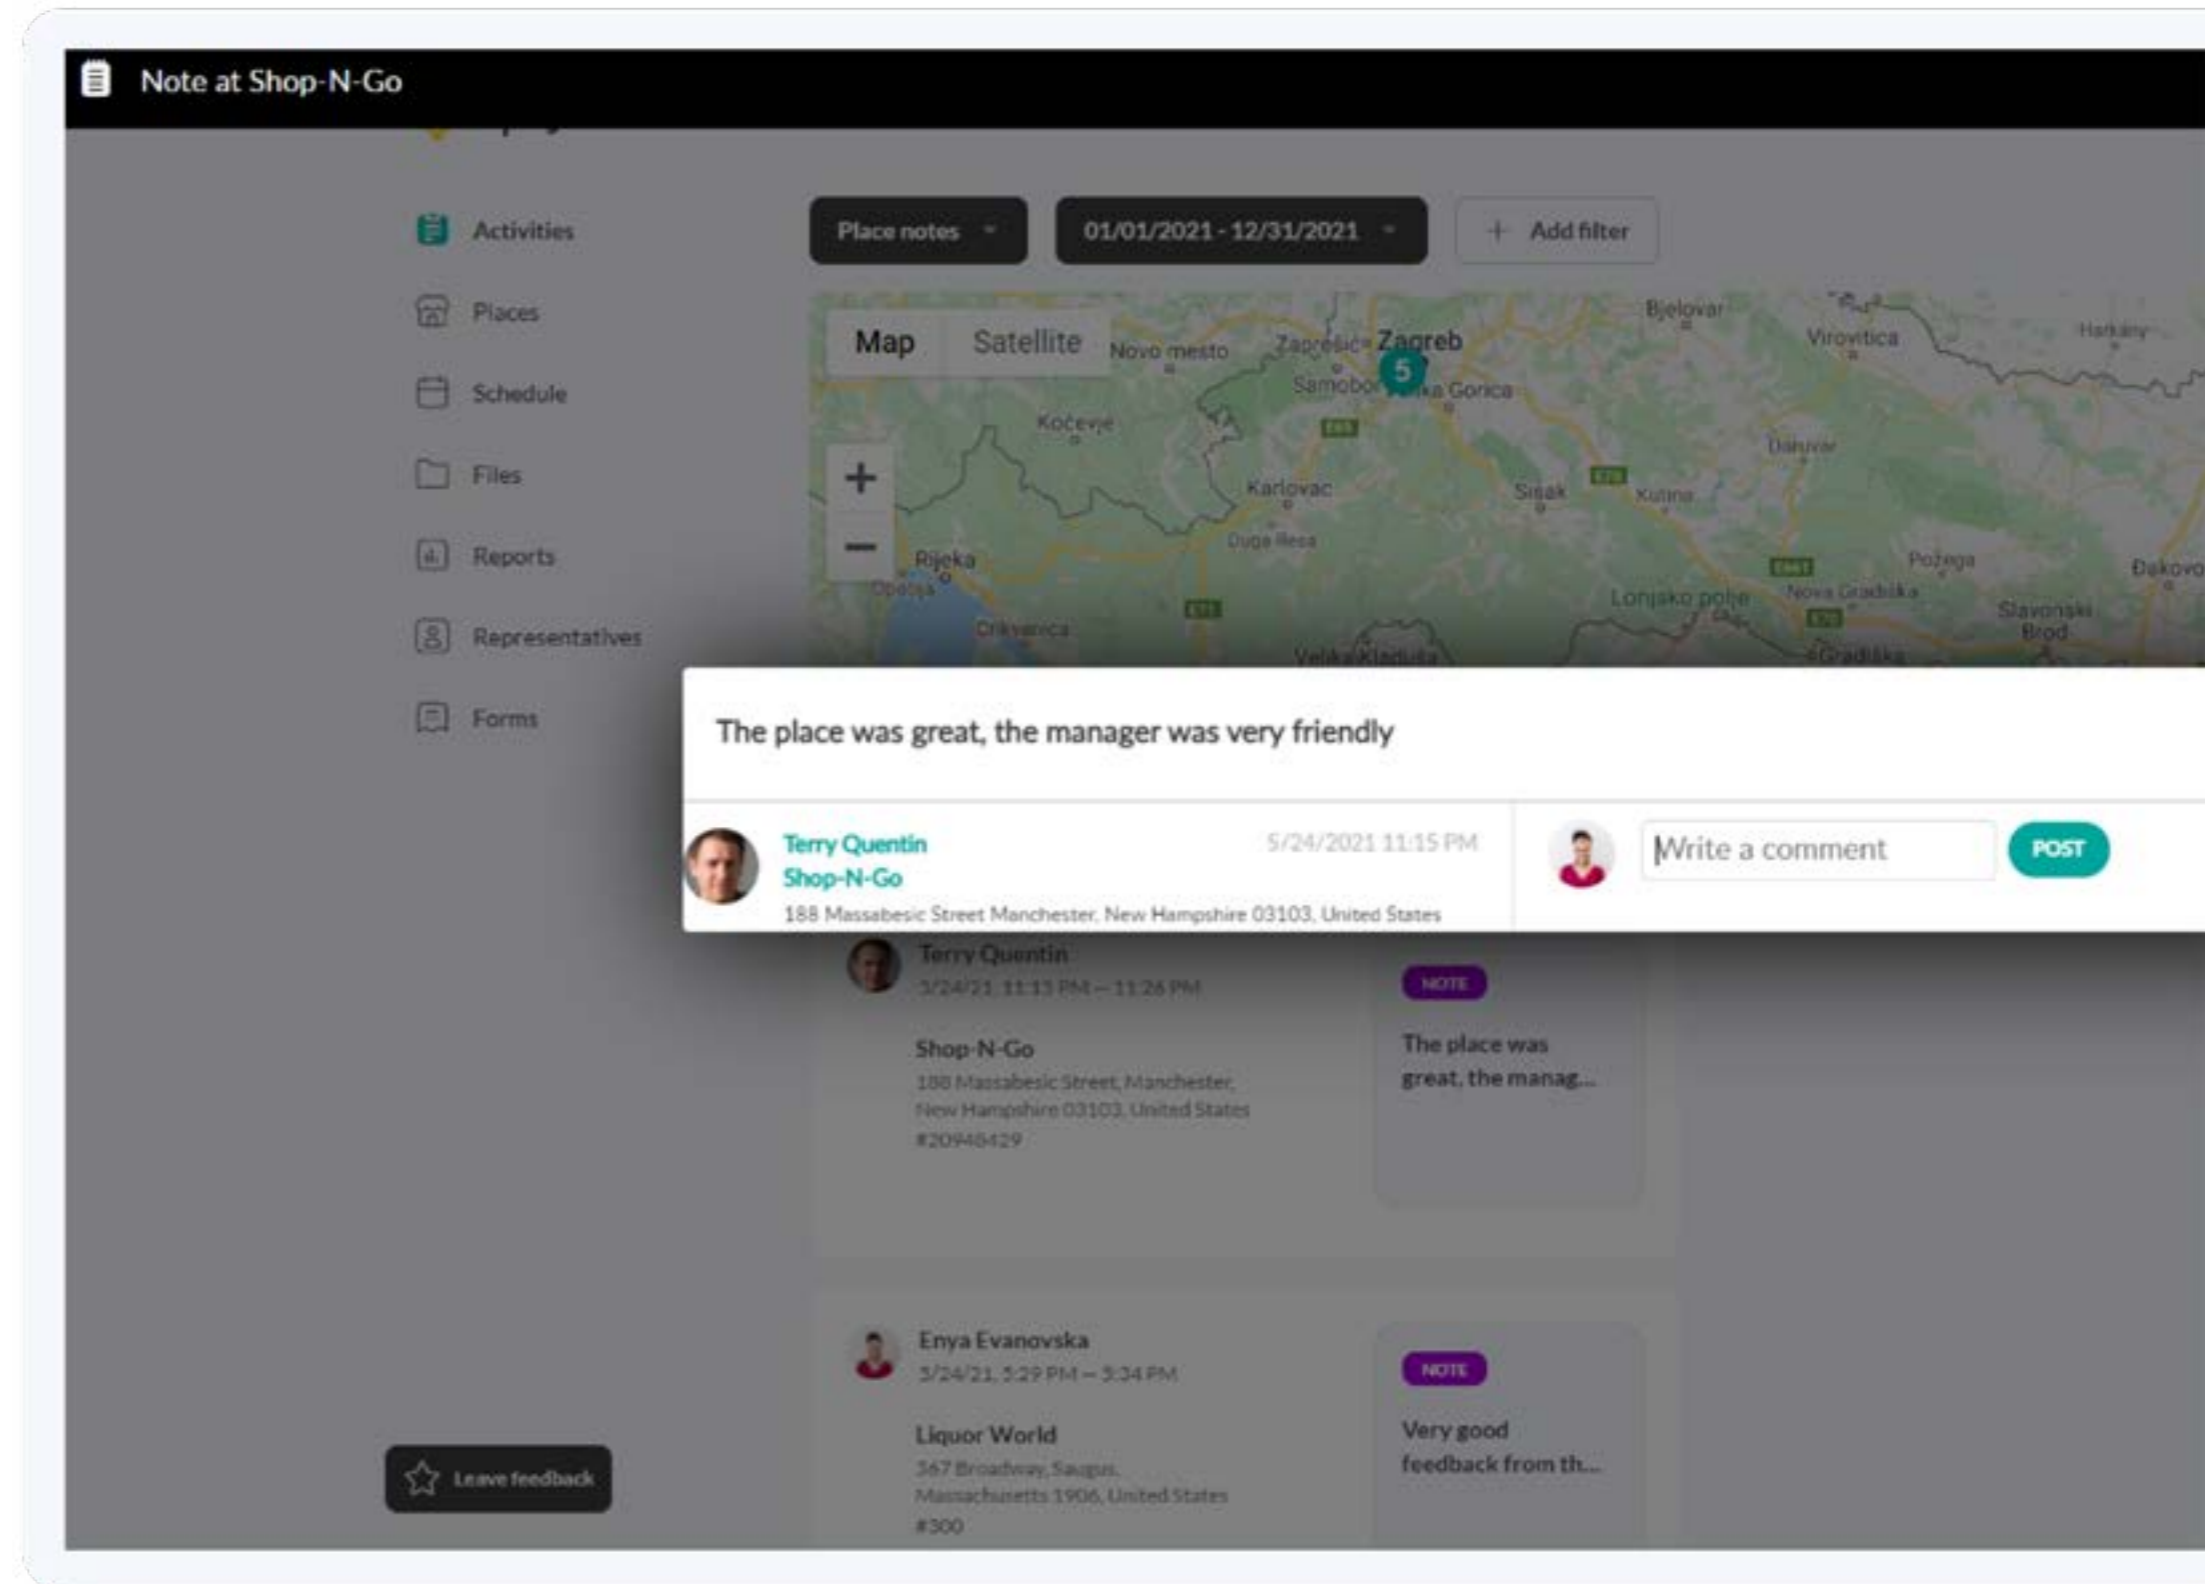

Also, Replsly provides management to ask questions about specific activities that have just happened in the field. After a **comment** is posted, the rep who created the activity will receive a notification and they will be able to reply.

To help you get started with our communication features, please refer to our knowledge base articles:

# LOOKING BACK ON INSIGHTS

Repsly automatically turns the data your team collects in the field into flexible, digestible reports. The Reports Tab helps managers visualize their data through real-time trend analysis. Choose from several different types of pre-existing reports or create your own custom dashboard.

**Summary Report** gives a high-level overview of reps' activities over a period of time. This report helps you get the best value for tracking and improving your business.
